

Custom Service Catalog

All pricing subject to change

Bench Rate

All services not associated with a fixed rate will be billed at a bench rate of \$65 per hour with a minimum charge of \$30.00

Day Rate

We have recently seen the need for a “Day Rate” for specific jobs not listed in our standard pricing. This is a type of “bulk” pricing to save you money on a job taking longer than an hour or two and less than a custom. Day Rate - \$300.00

Fixed-Rate

Most of the common repairs and modifications will be listed on the following pages, however, sometimes there will be unforeseen circumstances that require additional labor charges beyond fixed rate. In those cases, the customer will be notified of a new estimate.

Custom Services

This guide includes just a few of the more popular custom services Chaos Guitars offers. This is just a sampling of some popular modifications we do if there is something you don't see here contact us and we can provide you with the information needed. Custom Guitar Build Policy as of 2023:

As of 2023 we have decided to return to the strategy that we used to found Chaos Guitars and that is to stay true to the love and the passion of each individual build. The only way to do that is to only agree to build the jobs that spark passion and excitement in the builder, that is the best way to get the most out of your build. We will continue to build and sell one of a kind customs of our choice on a very limited scale every year and accept customer builds that inspire our builder on a limited scale as well. We encourage you to contact us to discuss your custom project ideas.
